Gordy DNA Surname Project Results as of May 7, 2008

To print this page, click the printer icon in the tool bar immediately above this page. Make sure "Shrink to fit page" is selected, as well as "Center and rotate". You will get text large enough to read (with your glasses!) and it will all appear on a single page.

The numbers **G1 - G12** that appear to the left of the individual's Haplogroup (in red or green) are the Gordy code numbers that refer to each individual in the associated lineage chart.
The "Haplo" designation indicates the Haplogroup to which each indivdual belongs. The DSN# labels shown in red indicate those markers which statistically show more rapid mutation rates.
